Return to Spire.PDF

Hi,
I have an issue with the last version of Spire.PDF .NET Library (not the free one), when i am calling the SaveAsImage method from the PdfDocument Object, it throws at runtime a System.MissingMethodException (no error during the compiling).

This problem occurs only on the Spire.PDF Library, but with the FreeSpire.Pdf, i don't have the problem, can you tell me why ?
=> I am using it inside a .net standard 2.0 project.

Thanks in advance for your help.

Doris.Liu

Thanks for your inquiry

I used our Spire.PDF 10.6.25 to test the code below, but didn't encounter the issue you mentioned. If you didn't use our latest version, suggest you update to it. If the issue still persists, please provide your document for our investigation and testing. Thanks in advance!

Code: Select all (#)

```
PdfDocument pdf = new PdfDocument();
pdf.LoadFromFile("GetZoomFactor.pdf");
Stream stream = pdf.SaveAsImage(0);
SKBitmap bitmap = SKBitmap.Decode(stream);
SKImage sKImage = SKImage.FromBitmap(bitmap);
FileStream fileStream = File.OpenWrite("PDFTest.jpg");
sKImage.Encode(SKEncodedImageFormat.Jpeg, 100).SaveTo(fileStream);
```

Spire.PDF 10.6.25: <https://www.e-iceblue.com/Download/download-pdf-for-r...>
Sincerely,
Doris
